

Data Processing Addendum

Synthetic DPA for AI maturity demo

Processing Scope

Acme may process customer contact information, implementation data, support tickets, scheduling metadata, and limited operational health data to provide the services.

Protected Data

Issue: The DPA references possible PHI processing, but the package does not include a fully approved BAA or customer-specific security exhibit.

Subprocessors

Acme will maintain a list of subprocessors and provide notice of material changes.

Security Measures

Acme will maintain administrative, physical, and technical safeguards described in the security exhibit.

Deletion

Upon termination, Acme will delete or return customer data within thirty days unless retention is required by law.
